

Your individual quotation

Kampala – Baltimore

Patient transport to the airport

We will pick up the patient from his or her location in a fully equipped ambulance. The pick-up time will be coordinated with the exact departure time of the patient's flight. An experienced on-board medical team will accompany the patient on the way to the airport.

Patient transfer in a scheduled airliner

In advance of the flight, a special patient stretcher bed is installed in the aircraft. The patient lies on the stretcher bed throughout the flight. One medical medical staff accompanies the patient and can intervene immediately if required.

Patient transport to the destination hospital

Another ambulance, equipped to the state-of-the-art standard, will be waiting at the destination airport, complete with the medical crew. We will drive the patient swiftly and safely to the destination hospital, where we will hand him or her over to the local doctors.

	Date	Time	Service / Location	Duration
	open	open	Patient transport from the hospital in Kampala to the airport	Open
	open	open	Departure from Entebbe International Airport (EBB)	23:55 h Connection flight
	open	open	Landing at Dulles International Airport (IAD)	
	open	open	Patient transport from the airport to the hospital in Baltimore	Open

Total price for stretcher, 1 patient, 1 medical staff and two companions in Economy:

\$67,000 USD

What is the next step?

Three simple steps to a safe medical transfer

Our aim is to organise a swift and safe medical transfer for you and relieve you of as much effort and worry as possible. Therefore, after receiving our quotation, only a few steps are needed to arrange an accompanied scheduled flight with us.

Placing your order

First of all, take your time to weigh up our offer. If you decide to go ahead with the ambulance flight we will send our respective order for you to confirm.

Preparation

Once the order has been confirmed, we will create a detailed flight plan with the exact departure and arrival times and will prepare all other aspects of the patient transport.

The Journey

A medically accompanied scheduled flight will bring the patient safely to their destination. Upon request, we can also take care of the ground transport to the departure airport and from the destination airport to the patient's final destination.

Let us assist you – we provide a personal service, every day, around the clock.

Our team is available to help you 24 hours a day, even at weekends and on public holidays. We would be glad to answer your questions at any time.
